

201 stainless steel bars:Stainless steel bars, 201 stainless steel bars, 201 stainless steel bar, 201 stainless round bars, 201 stainless flat steel, 201 stainless hexagonal bar, 201 stainless steel black bars, 201 stainless square bar, 201 stainless capstan bar , 201 stainless steel bars of environmental protection, 201 stainless steel bright bars.

Chemical Composition of 201 stainless steel bars:

Chemical Composition							
C	Mn	Si	Cr	Ni	S	P	N
≤0.15	5.5-7.5	≤0.75	16-18	3.5-5.5	≤0.03	≤0.06	≤0.25

Mechanical Property of 201 stainless steel bars:

Density (bs/cubic inch)	Elongation %	Modulus of elasticity (psi)
2801	55- 60	29,000,000

201 stainless steel bar, is new austenitic steel 300 series with Mn not Ni .With alkali, acid, high density, polished without bubbles characteristic, it makes high-quality materials to produce straps, back of the case, in some areas, 200 series stainless steel can replace the 304 series. The decay resistance of 200 series and 304 series stainless steel is in a great difference.
