

317L stainless steel plate:

317L stainless steel plate, 317L stainless steel industrial plate, 317L stainless high temperature-resistant steel plate, 317L stainless steel mirror plate, 317L stainless steel wire drawing board, 317L stainless steel 2B plate , 317L stainless steel medium plate, 317L stainless steel grinding plate, 317L Stainless steel color steel plates.

317L stainless steel ,compared to conventional 304 series stainless steel, has a greater corrosion resistance.317L stainless steel is a molybdenum-based austenitic stainless steel.317L alloy has a higher ductility, stress , compressive strength and high temperature corrosion resistance performance.

Chemical Composition of 317L stainless steel plate:

C %	Si %	Mn %	P %	S %	Cr %	Ni %	Mo %
≤ 0.03	≤ 1.0	≤2.00	≤0.045	≤0.03	18-20	11-15	3-4

Specification:

Thickness : cold -rolled :0.3-5mm hot rolled:5.0mm-8.0mm

Width :1000*2000mm; 1219*2400mm; 1500*6000mm; 1250*1500mm
