

302 stainless steel wire:

302 stainless steel semi-hard wire, 302 stainless steel full-hard wire, 302 stainless steel screw line, 302 stainless steel spring wire, 302 stainless steel full cord, 302 bright stainless steel wire, 302 stainless steel electrolysis line, 302 stainless steel axletree wire.

Features:

- 1, uniform and beautiful surface condition;
- 2, to be linear;
- 3, high ductility, fatigue strength;
- 4, good formability.

Chemical Composition of 201 stainless steel :

C	Cr	Ni	Mn	P	S	Si
≤ 0.15	17 - 19	8 - 10	≤ 2.00	≤ 0.035	≤ 0.03	≤ 1

The corrosion resistance of 302 stainless steel is similar to SUS304 stainless steel. Relatively high carbon content determines better strength. High strength will occur after cold working, but extension performance is worse than the 301 stainless steel. SUS302 stainless steel is mainly used for building exterior decoration.
